**The Guns of Navarone** Gregory Peck, Anthony Quinn and David Niven are Allied saboteurs assigned an impossible mission: infiltrate an impregnable Nazi-held island and destroy the two enormous long-range field guns that prevent the rescue of 2,000 trapped British soldiers. Supported by an all-star cast and produced on a grand scale, the film was an enormous success, receiving seven 1961 Academy Award nominations (including Best Picture) and winning for Best Special Effects. Although Foreman achieved his goal, it was MacLean who would wind up the true beneficiary; his novels became the source for many high adventure screen epics, including Ice Station Zebra and Where Eagles Dare.
