**Jurassic Park Trilogy** Jurassic Park Paleontologist Alan Grant and his paleobotanist girlfriend, Ellie Sattler, give lectures on dinosaur history between digs at remote exotic locales. One dusty afternoon, John Hammond, a millionaire inspired by scientific wonders, makes an offer to the erudite couple that they can't refuse: He asks them to act as consultants on his entrepreneurial endeavor--an amusement park with live dinosaurs as the main attraction. On an island off the coast of Costa Rica, Hammond's already biologically engineering living dinosaurs by extracting and reconstructing dino-DNA from fossilized insects. But bedlam ensues when Wayne, a computer genius, tampers with Jurassic Park's security system so that he can smuggle out a bunch of frozen embryos. The prehistoric creatures break loose around feeding time and the millionaire, the scientists, the park employees, and two children become fair game. *The Lost World: Jurassic Park* is director Steven Spielberg's sequel to his original dinosaur thriller. Dr. Ian Malcolm (Jeff Goldblum) returns for more dino-horror when, four years after the disaster at the would-be amusement park, another expedition is mounted by millionaire John Hammond (Richard Attenborough). To document the natural behavior of the beasts at a mysterious Site B, Hammond sends a team comprising Malcolm; Malcolm's girlfriend, paleontologist Dr. Sarah Harding (Julianne Moore); and a wildlife videographer (Vince Vaughn). They face adversity in the form of a less-than-scrupulous big-game hunter (Pete Postlethwaite) and, of course, the terrible lizards themselves. Paleontologist Alan Grant (Sam Neill) has sworn never to return to Jurassic Park. But he needs funding for his research, so when a wealthy thrill-seeking couple (William H. Macy and Téa Leoni) come calling, Grant and his protégée, Billy (Alessandro Nivola), agree to take them on a sightseeing flight. By the time Grant finds out what their true purpose is--to land on the island and search for their missing son--all of their lives are in peril. And Grant's newfound theory about Raptor intelligence will have its deadly proof. *Universal*

**Green Lantern** Hal Jordan (voice of Nathan Fillion) reveals six incredible tales of the Green Lantern Corps. to the intergalactic alliance's latest recruit on the eve of a defining battle with their sworn enemy Krona.
